Lyman Introduces Carbide Buttons

For Release: Immediately
January 2011

New Deluxe Carbide Expand/Decap Rod Assembly from Lyman offers advantages to upgrade bottleneck case resizing.

Lyman – a leader in the field of reloading products – has introduced the new Carbide Expander/Decapping Assembly featuring a super hard and slick Carbide Expander Button. The carbide button offers easier extraction through case necks, which will help prevent case stretching and lessen the frequency of case trimming. Free-floating, the carbide button self-centers on the case neck for smoother operation. The button is mounted on the decapping rod with adjustable positioning sleeves. The button can be adjusted into two positions on the rod allowing it to be used for a variety cases of a given caliber. It also allows the user to place the button higher in the die so the press linkage provides better leverage during the neck sizing.

Available in 6 calibers, the Carbide Expand/Decap Assemblies handle a range of cartridges:

22 Cal. Assembly – .222 Rem & .223 Rem;
243 Cal. Assembly - .243 Win & .243 WSSM
6.5mm Assembly - 6.5x55 & 260 Rem
270 Cal. Assembly - 6.8mm Rem & 270 Win
7mm Assembly - 7mm-08 & 7mm Mauser
30 Cal. Assembly - 30-30 & 300 Savage

The assembly fits all Lyman dies, and includes an adapter for use with RCBS dies.

The Lyman Deluxe Carbide Expand/Decap Assembly, as well as all Lyman products and brands, are available nationally through firearms and sporting goods dealers and mail order companies. Pachmayr, TacStar, Trius Traps, A-Zoom Precision Snap Caps, Butch's Gun Care, Uni-Dot and Targdots are also Lyman brands.
