Lyman's No. 2 Tang Sight for Uberti '66 & '73 Models.

**For Release: Immediately
January 2008**

Lyman's Popular Tang Sight is Now Available for Imported Winchester '66 and '73 Models.

Lyman Products - a historic manufacturer of metallic tang sights - has expanded their line of Number 2 Tang Sights to include two of the most popular lever action rifles. At the request of many Cowboy Action Shooters, these new designs fit the Winchester Models '66 and '73 imported by Uberti and others. These sights are all steel and faithful to the original design with height index marks on the elevation post. They are designed to fold down to allow use of the rifle's mid-sight for close work and then be flipped up for the long range rifle events or hunting.

In addition to adding an additional sighting option to the shooter's rifle, the sights include two aperture sighting discs - a small diameter, .040 Target aperture and a larger, .093 diameter hunting aperture. The aperture also functions to enhance the shooters vision for a sharper view of the front sight and target. Some shooters also find that using the tang sight without any aperture disc allows faster target acquisition.

Lyman's new Tang Sights for the Model '66 and '73, as well as all Lyman products and brands are available nationally through gunsmiths, firearms and sporting goods retailers and mail order companies. Pachmayr, TacStar, Trius Traps, Butch's Gun Care, TargDots, Uni-Dot Sights and A-Zoom Precision Snap Caps are all Lyman Brands.
