Lyman Introduces New Turbo[®] Sonic Case Cleaner

For Release: Immediately
January 2011

New Turbo[®]Sonic Ultrasonic Case Cleaner from Lyman promises case cleaning inside and out, including primer pockets, in less than 10 minutes.

Lyman – a leader in the field of reloading products – has introduced a new ultrasonic case cleaning system with exceptional speed and performance. The TurboSonic's heated tank and stainless steel basket combined with Lyman's specially formulated brass cleaning solution deliver superior cleaning of cases and primer pockets. The heated ultrasonic cavitation enhances the cleaning solution's performance to quickly lift and dissolve carbon, dirt and any residue left on fired cases. In fact, the unit can process up to 900 9mm cases in less than 15 minutes.

In addition, Lyman has also developed a specialized Gun Parts Cleaning Solution to expand the versatility of the unit. When used in the TurboSonic Cleaner, the Gun Parts Solution is perfect for complete cleaning of steel and stainless gun parts as well as common reloading items like dies, shellholders and other tools.

The Lyman TurboSonic Ultrasonic Case Cleaner and Cleaning Solutions, as well as all Lyman products and brands, are available nationally through firearms and sporting goods dealers and mail order companies. Pachmayr, TacStar, Trius Traps, A-Zoom Precision Snap Caps, Butch's Gun Care, Uni-Dot and Targdots are also Lyman brands.
