

### IDEAL QUICK REFERENCE CHART

This chart shows the appropriate dies furnished for Ideal Reloading Tools for any given caliber rifle or pistol. Always state tool being used when ordering dies.

The NEW STYLE #310 Tool is listed in the columns below. This new style model can be identified by the adjustable extractor hook, and the adapter die.

To find the interchangeability of the OLD STYLE #310 Tool handles (those without adjustable extractor hook and adapter die) refer to the caliber of the cartridge in column 1. Then find the number of the adapter in the third column. Any other cartridge having the same adapter number is interchangeable in those handles.

**LEGEND:**

- Column 2—Indicates handles made for long (L) or short (S) cartridges.
- Column 3—The numbers refer to groups of cartridges of approximately same body diameter.
- Column 4—Indicates groups of cartridges of approximately same head and rim dimensions.
- Column 5—Shows serial number of chambers for specific calibers.
- Column 6—Refers to length of cartridge.
- Column 7—Normal Expanding Plug diameter for cast bullets.
- Column 8—Normal Expanding Plug diameter of jacketed bullets.
- Column 9—Serial numbers of Seating Screws to fit nose of standard cast bullets.
- Column 10—Serial numbers of Seating Screws to fit nose of standard jacketed bullets.
